

Astro-test Changes to make:

First input field needs to show 'day'

Male/ Female could be slightly more centred

The screenshot shows a web browser at localhost:3000 displaying the Gravity website. A modal titled "Take the Astro-Test" is open. It contains a "Gender" section with "Male ♂" and "Female ♀" buttons. Below is a "Date of birth" section with "Da", "Month", and "Year" dropdowns. A pink "Get Started" button is prominent. Below it, a link says "Would rather skip this? Sign in". At the bottom, a disclaimer states "We will never share your data. By taking the test you agree to the Terms and Conditions and Privacy Policy". To the right of the form is a promotional image of a couple with the text "Astrology stood the test of time but is it still relevant in today's scientific world?". A "Take a test" button is at the bottom of the modal.

Can Take the test button be removed on this page? If not, leave for now as we will link the initial page to the current landing page

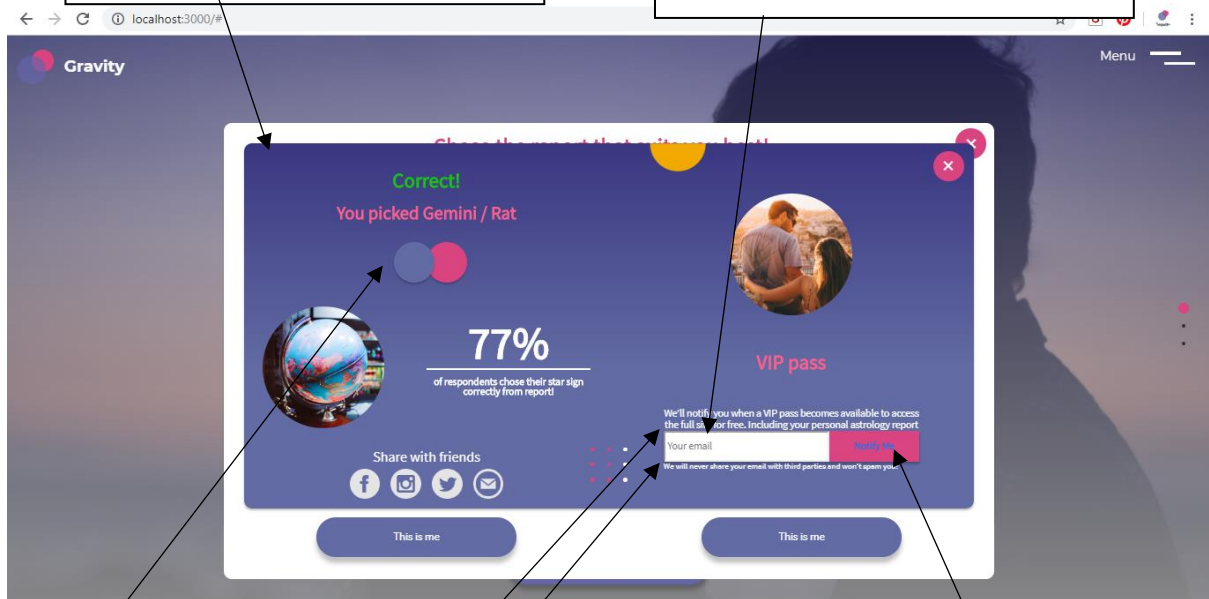

Change text in this button to "Take Test"

Report B has no scroll down?

The screenshot shows the same Gravity website with a modal titled "Chose the report that suits you best!". It presents two options: "Report A" and "Report B". Each report has a long, repetitive paragraph of text. Below each report is a "This is me" button. The modal also includes a close button (X) in the top right corner.

Results window needs to replace the Reports window or fully overlap it

You Email text- to be moved slightly to the right

Icon animals are missing?

Slight space between text and email box- please see Figma

Notify me text to be white
